

Citebase Search:

Autonomous Citation Database for e-print Archives

Tim Brody

Intelligence, Agents, Multimedia Group
University of Southampton

Content

- Motivations
- Behind the Scenes
- The Service
- arXiv.org author behaviour

Open Citation Project

- **“OpCit, a three year R&D project that began in October 1999 and completed at the end of 2002, was funded by the Joint NSF - JISC International Digital Libraries Research Programme”**
- “... to attempt to hyperlink each of the over 200,000 papers in Los Alamos's unique online Physics Archive to every other paper in the archive that it cites”

Open Archives Initiative

- Santa Fe (1999)
- “... to facilitate the discovery of content stored in distributed e-print archives.”
- Initial versions 2000ish
- arXiv.org a test-bed for OAI (0.9 thru 2.0)

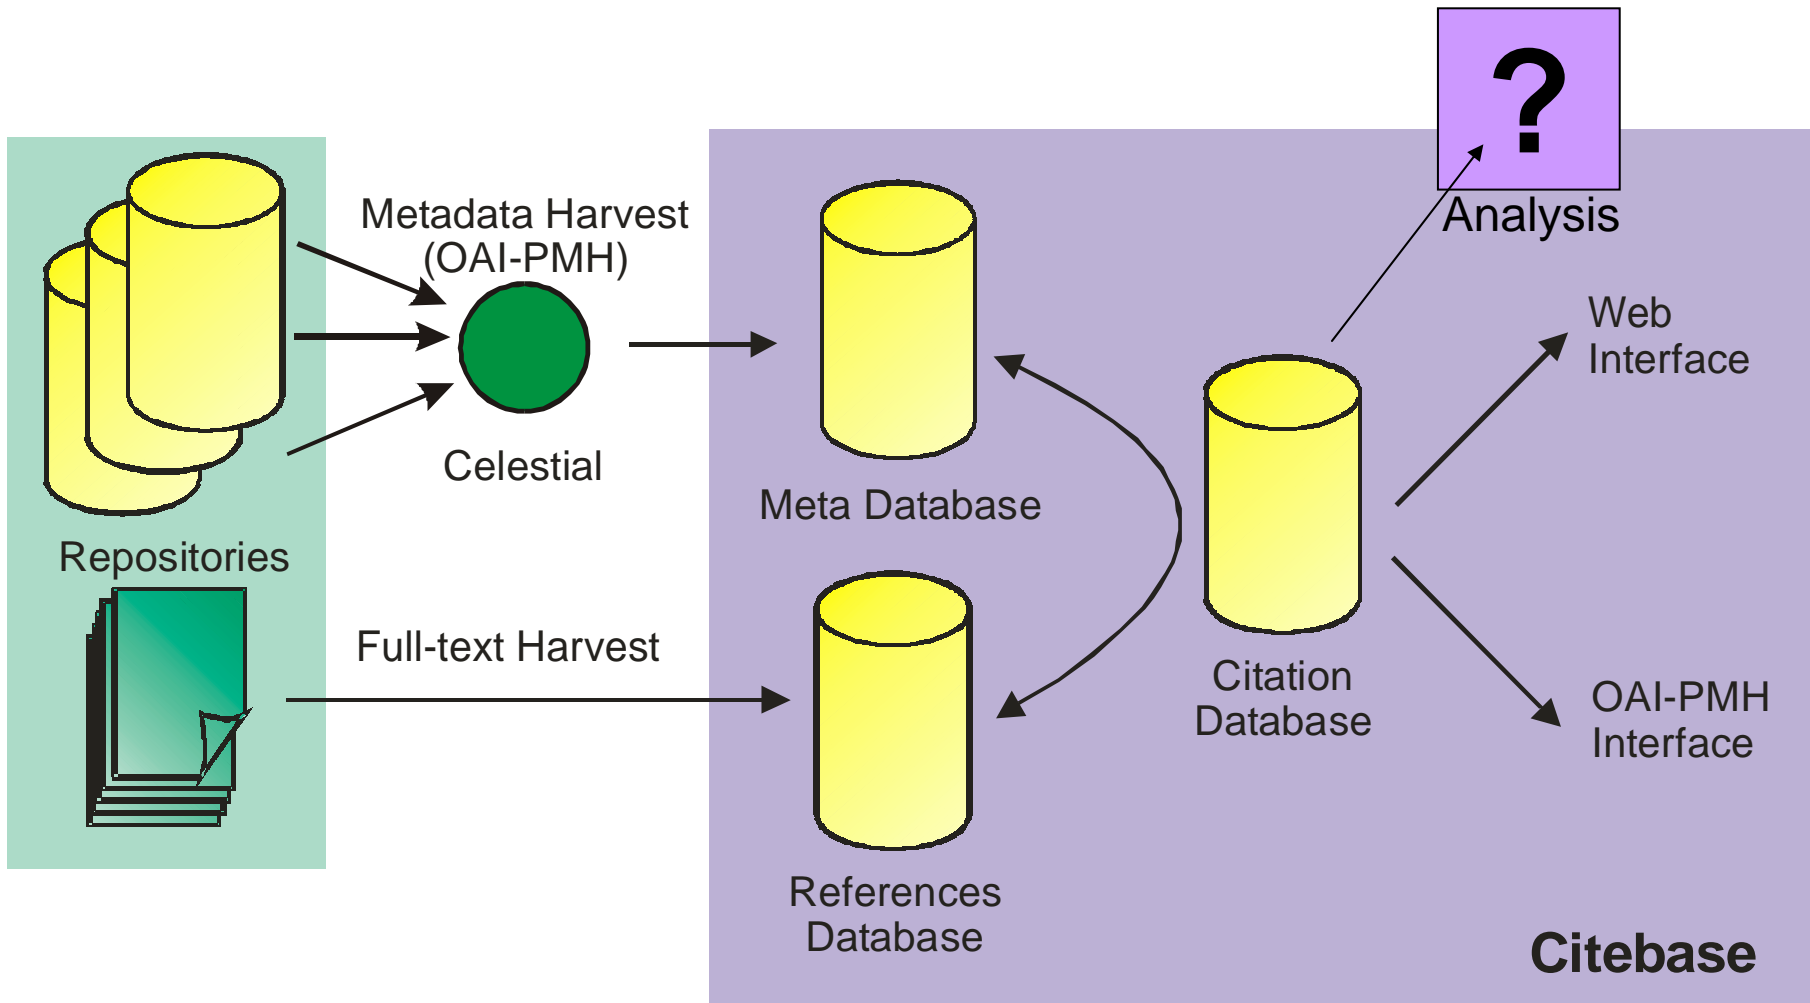

Citebase Search

- Coupled experiments with OAI with OpCit's reference linking
 - the first Citebase prototypes used Dienst
- Evolved into a “cross-archive Citation-linking search engine”: **Citation Database**
- Primary output of OpCit
- (changed approach from SFX-style ‘just-in-time’ linking to a linkbase)

So?

- “Google for the research literature”
- With an ACI who needs cross-ref, DOI, ‘digital libraries’?
 - (See also Guédon, Jean-Claude (2001)
<http://www.arl.org/arl/proceedings/138/guedon.html>)
- Citeseer, iCite, ... ?
- Separates the *service* from the *content* – anybody can build an ACI over OAI repositories

Citebase Data Flow

Content

- 250,000 full-text resources
 - 240,000 of which arXiv.org
- 6 million references
 - 29 mean refs/paper (therefore failed to extract references for 18% of papers)
 - (n.b. modal refs is 19)
- 1 million references linked internally to the full-text (15%)

Top 5 Articles Citing this Article ([explain?](#))[[Abstract](#) | [References](#) | [Cited By](#) | [Co-Cited With](#)]**[Large N Field Theories, String Theory and Gravity](#) [[Abstract/Citations](#), [PDF](#)]**877 *Aharony, O ; Gubser, S S ; Maldacena, J et al* (1999-05-14) oai:arXiv.org:hep-th/9905111

We review the holographic correspondence between field theories and string/M theory, focusing on the relation between compactifications of string/M theory on Anti-de Sitter spaces and conformal field theories. We review the background for this correspondence and discuss its motivations and the ...

Comment: 261 pages, 42 post-script figures. Please send any comment to jmaldac@fas.harvard.edu. v2: added references and small corrections. v3: minor changes and corrected discussion of SU(3)-invariant supergravity solution

[Anti-de Sitter Space, Thermal Phase Transition, And Confinement In Gauge Theories](#) [[Abstract/Citations](#), [PDF](#)]513 *Witten, Edward* (1998-03-16) oai:arXiv.org:hep-th/9803131

The correspondence between supergravity (and string theory) on AdS space and boundary conformal field theory relates the thermodynamics of $N=4$ super Yang-Mills theory in four dimensions to the thermodynamics of Schwarzschild black holes in Anti-de Sitter space. In this description, ...

Comment: 28 pp., added references and minor corrections

[Correlation functions in the CFT\(d\)/AdS\(d+1\) correspondence](#) [[Abstract/Citations](#), [PDF](#)]234 *Freedman, Daniel Z ; Mathur, Samir D ; Matusis, Alec et al* (1998-04-07) oai:arXiv.org:hep-th/9804058

Conformal techniques are applied to the calculation of integrals on AdS(d+1) space which define correlators of composite operators in the superconformal field theory on the d-dimensional boundary. The 3-point amplitudes for scalar fields of arbitrary mass and gauge fields in the AdS supergravity ...

Comment: 27 pages, LaTeX, 1 eps figure, few misprints corrected, references added

[The String Dual of a Confining Four-Dimensional Gauge Theory](#) [[Abstract/Citations](#), [PDF](#)]184 *Polchinski, Joseph ; Strassler, Matthew J* (2000-03-15) oai:arXiv.org:hep-th/0003136

We study $N=1$ gauge theories obtained by adding finite mass terms to $N=4$ Yang-Mills theory. The Maldacena dual is nonsingular: in each of the many

Top 5 Articles Co-cited with this Article ([explain?](#))[[Abstract](#) | [References](#) | [Cited By](#) | [Co-Cited With](#)]**Wilson loops in large N field theories** [[Abstract/Citations](#), [PDF](#)]231 *Maldacena, Juan M* (1998-02-28) oai:arXiv.org:hep-th/9803002

We propose a method to calculate the expectation values of an operator similar to the Wilson loop in the large N limit of field theories. We consider $N=4$ 3+1 dimensional super-Yang-Mills. The prescription involves calculating the area of a fundamental string worldsheet in certain supergravity ...

Comment: 12 pages, harvmac. v2: sign in eqn. (5.6) corrected, v3 typo corrected

The Large N Limit of Superconformal Field Theories and Supergravity [[Abstract/Citations](#), [PDF](#)]195 *Maldacena, Juan M* (1997-11-27) oai:arXiv.org:hep-th/9711200

We show that the large N limit of certain conformal field theories in various dimensions include in their Hilbert space a sector describing supergravity on the product of Anti-deSitter spacetimes, spheres and other compact manifolds. This is shown by taking some branes in the full M /string ...

Comment: 20 pages, harvmac, v2: section on AdS_2 corrected, references added, v3: More references and a sign in eqns 2.8 and 2.9 corrected

Anti De Sitter Space And Holography [[Abstract/Citations](#), [PDF](#)]183 *Witten, Edward* (1998-02-20) oai:arXiv.org:hep-th/9802150

Recently, it has been proposed by Maldacena that large N limits of certain conformal field theories in d dimensions can be described in terms of supergravity (and string theory) on the product of $d+1$ -dimensional AdS space with a compact manifold. Here we elaborate on this idea and propose ...

Comment: 40 pp.; additional references and assorted corrections

Gauge Theory Correlators from Non-Critical String Theory [[Abstract/Citations](#), [PDF](#)]182 *Gubser, S S ; Klebanov, I R ; Polyakov, A M* (1998-02-16) oai:arXiv.org:hep-th/9802109

We suggest a means of obtaining certain Green's functions in 3+1-dimensional $(\text{local } N) = 4$ supersymmetric Yang-Mills theory with a large number of colors via non-critical string theory. The non-critical string theory is related to critical string theory in anti-deSitter background. We introduce a ...

Comment: 15 pages, harvmac with btzmac; minor revisions, 1 reference added, the version to appear in Physics Letters B

This Article has referenced:

Citebase does not have the reference list from this article. This may be because the full text of the article could not be located, could not be converted to text (e.g. is scanned-images only), or the reference list could not be parsed. While we make every effort to improve the reference parsing facility, it can be difficult to parse references that are untitled (add a 'References' title above the bibliography), unnumbered, or are laid out in multiple columns.
